

*Harbour*  
INDUSTRIES  
High Performance Wire & Cable

Harbour Industries has been RoHS compliant since August 2005, nearly 1 year prior to the date specified in EU Directive 2002/95/EC. By being RoHS compliant we have certified that we do not use Polybrominated Diphenylethers(PBDE's) in our products. DecaBDE is simply one chemical variation in the all encompassing family of PBDE's. Therefore, by extension, since we do not use PBDE'S we also do not use DecaBDE.
